Dear Judge,

I know that this is only one person's opinion but I think that Microsoft should not be allowed to remain a monopoly because it limits technology. If Microsoft had real competitors they would strive to outdo the other company and that only results in better technology for us, the consumers. Plus I do believe in a free market economy that has been the US's motto since its birth, I think its called laissez-faire. Well, thank you judge for listening.
